

The bar graph below shows the percentage of all tickets to which operators have responded to the positive response system in compliance with state law, without regard to timeliness. The pie chart to the right shows the percentage of tickets to which operators have responded using an IOC status code within the time frame established by state law.

POSITIVE RESPONSE COMPLIANCE

ITIC, ITIC Lite, and ITIC Mobile activity all continue to grow, and make up a greater percentage of incoming locates. The YTD ITIC Lite total has nearly doubled, indicating homeowners are embracing it. Phone In activity will continue to make up less of the total as more IOC users make the change to on-line ticket entry.

MONTHLY ITIC ACTIVITY

ITIC PHONE IN ITIC LITE ITIC MOBILE

ITIC ACTIVITY Y-T-D

Y-T-D 2019 Y-T-D 2020

The number of tickets received through ITIC is nearly 80% of the total volume so far this year.

ITIC VS. PHONE IN

This chart tracks ITIC usage through the last few years.

COMPARATIVE ITIC VOLUME

Total number of incoming phone calls is slightly lower than last year and consistent with totals received in the two previous years.

TOTAL INCOMING CALLS Y-T-D

TOTAL INCOMING CALLS

The January 2019 abandonment rate was the result of a series of prank calls received by the center throughout the month. Once we blocked the caller's phone number, the calls stopped, and you can see that the abandonment rate returned to near-historical levels. The current abandonment rate is occurring as a result of message that is being played for all callers encouraging them to use ITIC. Those that hang up after hearing the message count as abandoned calls. Due to the ongoing increase in ITIC usage, we assume many people are following the message's suggestion.

CALLS ABANDONED

The average speed to answer is slightly higher than last year but still consistent with that experienced in preceding years.

AVERAGE SPEED TO ANSWER

The chart below reflects the average speed (ASA) to answer during the after hours period. The chart to the right shows the breakdown of after-hours tickets between phone and ITIC. The increase in after hours ASA is primarily due to calls received from people who wanted to clarify positive response system status information. This increased both talk and hold time for non-emergency calls.

AVERAGE SPEED TO ANSWER AFTER HOURS

2020

Average talk time is higher than it was last year at this time.

AVERAGE TALK TIME

The average time per ticket for this month is higher than last year.

AVERAGE TIME PER TICKET

November ticket volume is significantly higher than November 2019.

INCOMING TICKET TOTALS Y-T-D

INCOMING TICKET TOTALS

Outgoing ticket totals follow the pattern set by incoming tickets.

OUTBOUND TICKET TOTALS Y-T-D

OUTBOUND TICKET TOTALS

The in/out ratio has followed the historical pattern.

IN/OUT RATIO

Design Request System (DRS) Activity shows the total number of Design Information Requests (DIRs) and Design Locate Requests (DLRs) placed in a given month. Activity in both areas has grown since the system was first activated.

DRS SYSTEM ACTIVITY

The charts on this page provide a breakdown showing the time of day that incoming tickets were received.

TIME OF RECEIPT ANALYSIS

The number of MTD and YTD non-compliant tickets received is higher than 2019.

NON-COMPLIANT TICKETS Y-T-D

NON-COMPLIANT TICKETS NOV

The total number of emergency tickets received Y-T-D is significantly higher than in 2019. The monthly total is slightly higher.

EMERGENCY TICKETS Y-T-D

EMERGENCY TICKETS NOV

Both the monthly and annual total of dig-in tickets is higher in 2020 than in 2019.

DIG IN TICKETS Y-T-D

DIG IN TICKETS NOV

The total number of tickets where callers report the job is whitelined continues to exceed last year's levels.

WHITELINED TICKETS Y-T-D

WHITELINED TICKETS NOV

The Y-T-D number of tickets with GPS coordinates is slightly higher than 2019 levels. This is most likely the result of the detailed mapping available through NextGen.

TICKETS WITH GPS Y-T-D

TICKETS WITH GPS NOV

Overall homeowner ticket volume continues to rebound.

HOMEOWNER TICKETS Y-T-D

HOMEOWNER TICKETS NOV

This chart shows the number of times that the same location of work has been found on repeated tickets. There was an interest in analyzing the data to see how many emergencies were actually repeated tickets. The data seems to indicate that the number of "repeated" tickets is a significant part of the emergency total.
